Suppr. [TBC]

Business Objective

To link between hosts and socialites who enjoy experiencing homemade fine dining whilst at the same time meeting new people. The main goal of the app is to allow regular people to host dinner events at their home. The hosts will be able to set up the menu for the evening, add the possible activities, event topic and number of slots available. The customer (non-host) can use the app to book a reservation and attend the event. There is a reviewing process at the end.

Main App (Customer + Host access)

Login and Authentication

- Landing section to introduce people to the app and its concept
- Users can browse the app without login and registration

User Registration

Register as Visitor

- First name
